Earth's survivors cling to life on an unforgiving, distant planet, next to the sun! Three generations after the crash of the colony ship Icarus, lapyx is barely hanging on: one of thirteen cities suspended halfway down deep chasms. The sun on the diamond lands above will kill a man in less than five minutes. The ticktock monsters in the fog forest below are a little slower -- but quite a bit smarter. An electromagnetic wash has disabled the computers, the radios, even the lightbulbs. It's the steam and clockwork age reborn: a careful society, rationed and stratified. Which suits Simon Daud just fine. Simon likes the rules, and knows his place -- in the shadow of his older brother, Isaac. All he wants is to earn his wings as an ornithopter pilot and get to work in the flight bays. But on his final test flight, something goes wrong. Isaac is killed. Simon is burned; his body will never be the same. Neither will his world. Not everything in lapyx is quite as it seems, and through his rehabilitation Simon falls into the middle of a conspiracy that will bring everything he's ever known to the

ground. Down in the fog forest, monsters await -- but so does the truth . . . if Simon can survive long enough to find it. *Historical Guide to NASA and the Space Program* Steam Press NEW ZEALAND The Flight is recovering in a remote mountain hideaway. They think they're safe, but they couldn't be more wrong. When Evolutionary Corp mercenaries in helicopters hunt them down, only Condor and Kestrel manage to escape. With nowhere else to turn and desperate for help to save their friends, the two flee across the country to the jubilant Angelists. Meanwhile, a nightmare unfolds for the imprisoned teenage Icarus. A shocking bond is revealed which changes everything. Pushed to the limits of endurance, somehow they must survive the most dangerous place they can imagine. Somehow, they must fly free.

Richard Scarry's Pie Rats Ahoy! New Directions Publishing

In late 19th-century Paris, the writer Hubert is shocked to discover that Icarus, the protagonist of the new novel he's working on, has vanished. Looking for him among the manuscripts of his rivals does not solve the mystery, so a detective is hired to find the runaway character.

This book introduces a compelling new personality to the modernist canon, Marisa Mori (1900-1985), who became the only female contributor to *The Futurist Cookbook* (1932) with her recipe for "Italian Breasts in the Sun." Providing something more complex than a traditional biographical account, Griffiths presents a feminist critique of Mori's art, converging on issues of gender, culture, and history to offer new critical perspectives on Italian modernism. If subsequently written out of modernist memory, Mori was once at the center of the Futurism movement in Italy; yet she worked outside the major European capitals and fluctuated between traditional figurative subjects and abstract experimentation. As a result, her in-between pictures can help to re-think the margins of modernism. By situating Mori's most significant artworks in the critical context of interwar Fascism, and highlighting her artistic contributions before, during, and after her Futurist decade, Griffiths contributes to a growing body of knowledge on the women who participated in the Italian Futurist movement. In doing so, she explores a woman artist's struggle for modernity among the Italian Futurists in an age of Fascism.

The Flight of Icarus Harper Collins

"I was just an ordinary teenager with ordinary problems. Then my body started changing. Growing. I realized I wasn't normal. I'm not even human." "Rejected, terrified, confused, all I could do was run away, find somewhere safe to hide and figure things out. Then I discovered I wasn't alone." "We have only one way to survive." "Fly." When teenager Tyler Owen develops a bit of back pain, he doesn't think much of it at first. Even the strange swelling and growths that follow can't prepare him for the sudden emergence of his brand new wings that at the same time save and destroy his life. On the run from everyone from the sinister Evolutionary Corporation to the religious Angelist cult, he unintentionally attracts others the same as he is, like Miguel and Victoria whose lives have also been turned upside down. Together they form the Flight, finding out the hard way what it means to be the first in a new species, when all they want to do is learn how to spread their wings... *First Flight* is the first novel in the YA urban fantasy series **GENERATION ICARUS**.

On a windy spring morning in an ancient Cretan village, Rory MacLean fell to earth. His mother had died a few months earlier and a single obsession had risen from his grief: the notion to build a feather-light flying machine. And so, on the island where Daedalus and Icarus had made man's maiden flight, MacLean journeyed back to beginnings, back into the Greek myths, and—with the help of his Cretan neighbors and plenty of wine—built a plane and tried to fly. Falling for Icarus is at once a meditation on love, a celebration of the passion for flight, and a hilarious, vivid portrait of a village. Its generous and exhilarating characters restore MacLean's faith in life. Through them, he tells a soaring, moving story about how a dream can transform sadness.

Sleek. Chic. Notoriously guarded.

Welcome to the secret world of Gabrielle Chanel. The story of Chanel begins with

an abandoned child, as lost as a girl in a dark fairy tale. Unveiling remarkable new details about Gabrielle Chanel's early years in a convent orphanage and her flight into unconventional adulthood, Justine Picardie explores what lies beneath the glossy surface of a mythic fashion icon. Throwing new light on her passionate and turbulent relationships, this beautifully constructed portrait gives a fresh and penetrating look at how Coco Chanel made herself into her own most powerful creation. An authoritative account, based on personal observations and interviews with Chanel's last surviving friends, employees and relatives, it also unravels her coded language and symbols, and traces the influence of her formative years on her legendary style. Feared and revered by the rest of the fashion industry, Coco Chanel died in 1971 at the age of eighty-seven, but her legacy lives on. Drawing on unprecedented research, Justine Picardie brings her fascinating, enigmatic subject out of hiding and uncovers the consequences of what Chanel covered up, unpicking the seams between truth and myth in a story that reveals the true heart of fashion.

NASA—the National Aeronautics and Space Administration created in the wake of the Space Act—has and continues to accomplish those precepts every day. With many hundreds of satellites launched into space and close to 200 human spaceflights, NASA is a proven leader in space exploration. Most of the US space exploration efforts have been led by NASA, including the Apollo moon-landing missions, the Skylab space station, and later the Space Shuttle. Currently, NASA is supporting the International Space Station and is overseeing the development of the Orion

Multi-Purpose Crew Vehicle, the Space Launch System and Commercial Crew vehicles. NASA is also responsible for the Launch Services Program which provides oversight of launch operations and countdown management for unmanned NASA launches. The Historical Guide to NASA and the Space Program contains a chronology, an introduction, appendixes, and an extensive bibliography. The dictionary section has over 500 cross-referenced entries on space missions, astronauts, technical terms, space shuttles, satellites and the international space station. This book is an excellent access point for students, researchers, and anyone wanting to know more about NASA and space exploration.

"Barely recovered from their last escape, the Flight is under pressure both inside and out. Although Miguel has taken the name Condor and his loyalty is now unquestionable, the tension is quietly building between him and his best friend Hawk as they vie for Kestrel's attention. However, she refuses to tear apart their friendship - and the Flight - by choosing either of them. They have more urgent concerns. Then Hawk disappears on the eve of their longest journey yet. The Flight have no choice but to set off on their search for the elusive White Wings without him, aware they might be flying right into a trap - but is it set by the malevolent Evolutionary Corporation, or the fanatical Angelist cult? It's a game of cat and sparrow that the Flight can't win every single time, and their enemies are waiting to pounce. Even when captured, caged and confused, the Flight will never stop fighting for that second chance ... even if it destroys them"---

 Founded by Thomas H. Davis in 1948, Piedmont Airlines was one of the most respected regional airlines of its time. This exhaustive history follows the airline from its humble beginnings at Smith Reynolds Airport in Winston-Salem, North Carolina, to its 1989 absorption into USAir after a buyout at the highest price ever commanded by a regional airline. Drawing upon corporate documents, local news stories, and countless personal interviews with former Piedmont employees, the author tells the airline's history in detail. Nearly 100 photographs show the airline's development, and two appendices provide comprehensive lists of its fleet and service destinations. Fully indexed.
Marisa Mori and the Futurists Steam Press

Tracing the remarkable history of a certain kind of flying machine—from the

rocket belt to the jet belt to the flying platform and all the way to Yves Rossy's 21st-century free flights using a jet-powered wing—this historical account delves into the technology that made these devices possible and the reasons why they never became commercial successes on a mass scale. These individual lift devices, as they were blandly labeled by the government men who financed much of their development, answered man's desire to simply step outside and take flight. No runways, no wings, no pilot's license were required. But the history of the jet pack did not follow its expected trajectory and the devices that were thought to become as commonplace as cars have instead become one of the most overpromised technologies of all time. This fascinating account profiles the inventors and pilots, the hucksters and cheats, and the businessmen and soldiers who were involved with the machines, and it tells a great American story of a technology whose promise may yet, one day, come to fruition.
