In 1980, the  
newly  
independent

and democratic Zimbabwe was a beacon of hope in a troubled region. Three decades later, Zimbabwe became the focus of international attention for very different reasons: acrimonious racial relations, controversial elections, economic hardship, and military intervention in the Democratic Republic of the Congo. Mugabe and the Politics of Security in Zimbabwe

argues that this unfortunate transition is intrinsically linked to the ways in which President Robert Mugabe used the politics of domestic and external security for his own gain. Abiodun Alao presents a comprehensive study of defense institutions, domestic security policy, and external use of military force during Mugabe's decades of rule. He identifies the role of

personality in security and explains how the machinations of a self-perpetuating ruler shaped the economic and political dynamics of the struggling nation. He also provides analytical perspectives on Mugabe's transformations from a freedom fighter to a stable president of a relatively economically strong, independent country, and finally to an imprudent autocrat and international

pariah. Nuanced, impassioned, and timely, Mugabe and the Politics of Security in Zimbabwe sheds new light on the effects of national security policy and develops a clear picture of the country's past, present, and future.

Springer Science & Business Media  
This book focuses on news silence in Zimbabwe, taking as a point of departure the (in)famous blank spaces

(whiteouts) which newspapers published to protest official censorship policy imposed by the Rhodesian government from the mid-1960s to the end of that decade. Based on archived news content, the author investigates the cause(s) of the disappearance of blank spaces in Zimbabwe's newspapers and establishes whether and how the blank spaces may have been

continued by stealth and proposes a model of doing journalism where news is inclusive, just and less productive of blank spaces. The author explores the broader ramifications of news silences, tacit or covert on society's sense of the world and their place in it. It questions whether and how news media continued with the practice of epistemic deletions and continue to draw on the

colonial archive for conceptual maps with which to define and interpret contemporary postcolonial realities and challenges in Zimbabwe. This book will be of interest to scholars, researchers and academics researching the press in contemporary Africa, critical media analysis, media and society studies, and news as discourse. Disha Publications At

Independence in 1980, Julius Nyerere called Zimbabwe 'the jewel of Africa', and cautioned its new leaders not to tarnish it. Tragically, they paid no heed to Africa's esteemed elder statesmen. Arguably - and only if one ignores the carnage of Gukurahundi - the first decade was a developmental one, with resources being used prudently to benefit the formerly disadvantaged majority

population. However, the 1990s witnessed a transition from a developmental to a predatory leadership which saw Zimbabwe cross the millennial line in crisis, where it has remained ever since. While many African countries have moved forward over the last three decades, Zimbabwe has gone relentlessly backwards, save for the four-year interregnum of the

tripartite coalition government, 2009-2013. Virtually all development indicators point in the wrong direction and the crisis of poverty, unemployment, and the erosion of health, education and other public goods continues unabated. The imperatives of political survival and power politics supersede those of sound economics and public welfare. Moreover, unless good

politics are conjoined with a sound people-first policy, the country will continue sliding downhill. Zimbabwe's Trajectory tells the story of the country's post-independence dynamics and its recent descent into becoming one of the three most unhappy countries in the world. **Empirical Insights Into Qualitative Research Methodology** African Books Collective This book is

the first to tackle the difficult and complex politics of transition in Zimbabwe, with deep historical analysis. Its focus is on a very problematic political culture that is proving very hard to transcend. At the center of this culture is an unstable but resilient 'nationalist-military' alliance crafted during the anti-colonial liberation struggle in the 1970s. Inevitably,

violence, misogyny and masculinity are constitutive of the political culture. Economically speaking, the culture is that of a bureaucratic, parasitic, primitive accumulation and corruption, which include invasion and emptying of state coffers by a self-styled 'Chimurenga aristocracy.' However, this Chimurenga aristocracy is not cohesive, as the politics that led to Robert

Mugabe's ousting from power was preceded by dirty and protracted internal factionalism. At the center of the factional politics was the 'first family': Robert Mugabe and his wife, Grace Mugabe. This book offers a multidisciplinary examination of the complex contemporary politics in Zimbabwe, taking seriously such issues as gender, misogyny, militarism,

violence, media, identity, modes of accumulation, the ethnicization of politics, attempts to open lines of credit and FDI, national healing, and the national question as key variables not only of a complete political culture but also of difficult transitional politics.

This comprehensive volume provides teachers, researchers and education professionals

with cutting edge knowledge developed in the last decades by the educational, behavioural and neurosciences , integrating cognitive, developmental and socioeconomic approaches to deal with the problems children face in learning mathematics. The neurocognitive mechanisms and the cognitive processes underlying acquisition of arithmetic abilities and

their significance for education have been the subject of intense research in the last few decades, but the most part of this research has been conducted in non-applied settings and there's still a deep discrepancy between the level of scientific knowledge and its implementation into actual educational settings. Now it's time to bring the results from the laboratory

to the classroom. Apart from bringing the theoretical discussions to educational settings, the volume presents a wide range of methods for early detection of children with risks in mathematics learning and strategies to develop effective interventions based on innovative cognitive test instruments. It also provides insights to translate research knowledge into public

policies in order to address socioeconomic issues. And it does so from an international perspective, dedicating a whole section to the cultural diversity of mathematics learning difficulties in different parts of the world. All of this makes the International Handbook of Mathematical Learning Difficulties an essential tool for those involved in the daily struggle to prepare the future generations to

One reason lies in the colonial economy, which was predicated on an ideology of white supremacy, creating an enclave formal economy employing one-fifth of the labour force. Yet over three decades after</p>	<p>independence, the non-formal segment has become even more entrenched. This book assesses Zimbabwe's economy through three main phases: 1980-90 when a strong social policy framework proved difficult to sustain due to erratic growth, and 1991-96, when structural adjustment demanded a market-driven approach to development. The third phase is characterized by crisis-</p>

management leading to policy inconsistencies and reversals. Not surprisingly, such incoherence saw the economy descend into hyperinflation and paralysis in 2007-2008, leading to the signing of the Global Political Agreement in September 2008. In the absence of formal dollarization, economic recovery after the adoption of the multi-currency regime has remained fragile,

leaving an estimated 70 per cent of the population outside the banking system. This has further entrenched uneven (enclave) growth as the economy remains locked in a low-income poverty trap. There is a need to facilitate transition towards formality to promote decent jobs. Furthermore, a strategic, developmental role for the state in the economy is now widely

recognized as vital for development. Beyond the Enclave argues for a new approach to development in Zimbabwe based on pro-poor and inclusive strategies, which will contribute to the well-being of all of its citizens and wise stewardship of its resources. It offers suggestions on policy formulation, implementation, monitoring and evaluation in all sectors, designed to

promote inclusive growth and humane development.

The book represents a contribution to policy formulation and design in an increasingly knowledge economy in Zimbabwe. It challenges scholars to think about the role of

education, its funding and the egalitarian approach to widening access to education.

The nexus between education, democracy and policy change is a complex one.

The book provides an illuminating account of the constantly evolving notions of national identity, language and citizenship from the Zimbabwean experience.

The book discusses educational successes and

challenges by examining the ideological effects of social, political and economic considerations on

Zimbabwe's colonial and postcolonial education.

Currently, literature on current educational challenges in Zimbabwe is lacking and there is very little published material on these

ideological effects on educational development in Zimbabwe.

This book is likely to be one of the first on the impact

of social, political and economic meltdown on education. The book is targeted at local and international academics and scholars of history of education and comparative education, scholars of international education and development, undergraduate and graduate students, and professors who are interested in educational development in Africa, particularly Zimbabwe. Notwithstandi

ng, the book is a valuable resource to policy makers, educational administrators and researchers and the wider community. Shizha and Kariwo's book is an important and illuminating addition on the effects of social, political and economic trajectories on education and development in Zimbabwe. It critically analyses the crucial specifics of the Zimbabwean situation by providing an in depth

discourse on education at this historical juncture. The book offers new insights that may be useful for an understanding of not only the Zimbabwean case, but also education in other African countries. Rosemary Gordon, Senior Lecturer in Educational Foundations, University of Zimbabwe Ranging in temporal scope from the colonial era and its elitist legacy through the golden era of populist,

universal elementary education to the disarray of contemporary socioeconomic crisis; covering elementary through higher education and touching thematically on everything from the pernicious effects of social adjustment programmes through the local deprofessionalization of teaching, this text provides a comprehensive, wide ranging and yet carefully	detailed account of education in Zimbabwe. This engagingly written portrayal will prove illuminating not only to readers interested in Zimbabwe's education specifically but more widely to all who are interested in how the sociopolitical shapes education-how ideology, policy, international pressures, economic factors and shifts in values	collectively forge the historical and contemporary character of a country's education.
