Use during electrical class preparation tutoring sessions. NEC questions and answers are addressed for the electrician studying for their Master Electrician Exam License or Journeyman License. Use this book with your 2005, 2008, 2011, or 2014 NEC National Electrical Code book and Fire alarm code book. Take to your Electrical preparation class as your Electrical workbook copying Electrical class notes and answer Electrician exam type questions given in this book. Use during electrical class preparation tutoring sessions. Perfect for any Electrical class or Electrical Teacher preparing students on any level. Electrical tutors and students can now be on the same page!!! The National Electrical Code Book or NEC is unique and easy to navigate if you learn how to use the index located in the back of the book. Using a keyword in your question will give you every possible article in the book that may contain the answer you are looking for (if using the index) versus using the table of contents that only give you the information pertaining to that one specific topic neglecting the other 10 other sections in which your answer may appear. Using the top left hand and top right hand corners of the page gives you the range of articles that the two pages contain. Tabs and highlighting the title of articles and Part I, II, III etc.....of that specific article will allow you to recognize what information pertains to that part of the article. This should be done prior to test taking. The NFPA 72 Fire Alarm book A little more time consuming though, the Index is a great way to use this book giving you the exact article number to your question. The

Table of Contents however is a little easier pointing you in the right direction with the exact page number to start your search. The book is marked by page number and not the article number as the Electrical code book. For example Manual Actuated Alarm Initiating Devices also known as pull boxes in the Table of Contents fall in chapter 17.14 which points you to 72-99. The 72 is NFPA 72 (Fire Alarm Book) and the 99 is the page. Using the top left and top right hand corners will give you only the page numbers and not the article numbers. If looking for the proper mounting of smoke detectors in 29.8.3* understand that the * directs you to Annex A which has additional information pertaining to that article. The new article to check now would be A 29.8.3 and if you do not know where Annex A starts, the Table of Contents will tell you. Tabs as well as a highlighting where every chapter begins as well as subarticles will help you before test taking.

Welcome, to the final step in mastering the National Electrical Code. The 2020 National Electrical Code Prep Course Questions. This workbook is packed with need to know info. This workbook covers more of what you learned in Tables and Calculations. Remember repetition is critical in learning the material. Once you complete the first half of the workbook, you will get tested on the same questions but in random order through 8 self-timed practice exams. While completing the workbook, the candidate will notice their confidence growing and will eventually will be able to locate the necessary codes with lightning speed. In my 17 years of electrical trade experience, I have seen people firsthand know how to do the job and yet become very overwhelmed during the testing process. The majority of study material on the market today focuses on how to interpret or apply the code, it does not teach the candidate how to apply their knowledge to the exam material. No other workbook focuses on speed and learning how to apply the code to the test. For example, if you have 4 min a question and the method applied is to use tabs or the index in the back to retrieve answers. Valuable time is being wasted, this course will teach you how to answer questions and the most efficient tools to utilize during the testing process. Repetition is key, in understanding the material and answering questions effectively and efficiently. Although not all possible questions can be covered, by completing the workbook the candidate will gain the confidence and knowledge to tackle their own questions on a test, in the field, or in the office. With the National Electrical Code changing every 3 years, no matter what your skill level is: electrical engineer, apprentice, or somewhere in between everyone can benefit from this system.
