The Ultimate French Review and Practice, Premium Fourth Edition Heinle & Heinle Publishers

Llamamos enfoque oral a las metodologías de aula en didáctica de la pronunciación que son plenamente coherentes con el enfoque comunicativo. En el camino de compartir y valorar estas metodologías, en esta obra reunimos una serie de acciones didácticas dirigidas a los distintos niveles educativos, en diversas lenguas, que se han llevado a cabo siguiendo un modelo de investigación-acción. El enfoque oral se define por tres principios fundamentales, el primero de los cuales pasa por trabajar la lengua oral desde la propia oralidad. En efecto, la mediación de la lectoescritura es el factor más problemático en lo relativo al aprendizaje de la pronunciación en lenguas extranjeras, por lo que proponemos vencer su influencia, minimizando su aparición en los momentos de oralidad y evitando que constituya el eje del trabajo oral. Un segundo principio consiste en tratar la pronunciación como lengua oral. Nos interesa no tanto la corrección fonética como la fluidez del habla, no tanto la perfección lingüística como la eficacia

comunicativa, y no tanto la producción descontextualizada como las estrategias de interacción. El peso no ha de recaer en la excelencia en la pronunciación, sino en la posibilidad de hacerse entender y de negociar lo que no se entiende. Finalmente, es clave convertir el aula de instrucción formal en un contexto significativo. De ahí que abogemos por espacios en los que sea posible la inmersión fónica y en donde los propios alumnos se puedan convertir en interlocutores habituales, porque están trabajando conjuntamente para llevar a cabo una tarea significativa. No están aprendiendo pronunciación, sino que están haciendo cosas interesantes, y, para poder hacerlas, están comunicándose, es decir, están hablando: pronuncian.

Over the course of its three-hundred-year history, the Catholic Church in Louisiana witnessed a prolonged shift from French to English, with some south Louisiana churches continuing to prepare marriage, baptism, and burial records in French as late as the mid-twentieth century.

Speaking French in Louisiana, 1720–1955 navigates a complex and lengthy process, presenting a nuanced picture of language change within the Church and situating its practices within the state’s sociolinguistic evolution. Mining three centuries of evidence from the Archdiocese of New Orleans archives, the authors discover proof of an extraordinary one-hundred-year rise and fall of bilingualism in Louisiana. The multiethnic laity, clergy, and religious in the nineteenth century necessitated the use of multiple languages in church functions, and bilingualism

remained an ordinary aspect of church life through the antebellum period. After the Civil War, however, the authors show a steady crossover from French to English in the Church, influenced in large part by an active Irish population. It wasn’t until decades later, around 1910, that the Church began to embrace English monolingualism and French faded from use. The authors’ extensive research and analysis draws on quantitative and qualitative data, geographical models, methods of ethnography, and cultural studies. They evaluated 4,000 letters, written mostly in French, from 1720 to 1859; sacramental registers from more than 250 churches; parish reports; diocesan council minutes; and unpublished material from French archives. Their findings illuminate how the Church’s hierarchical structure of authority, its social constraints, and the attitudes of its local priests and laity affected language maintenance and change, particularly during the major political and social developments of the nineteenth and early twentieth centuries. Speaking French in Louisiana, 1720–1955 goes beyond the “triumph of English” or “tragedy of Cajun

French” stereotypes to show how south Louisiana negotiated language use and how Christianization was a powerful linguistic and cultural assimilator.

The papers in this volume, presented at the Royal Institute of Cultural Heritage (KIK-IRPA) in Brussels in November 2012, cover a wide range of works of art, periods, sources and approaches, from Dioscorides to contemporary artists' installations. The theme of the conference is reflected in studies such as Tingely's explosive Homage to New York, the evolutions and transformations of harpsichords in France in the seventeenth and eighteenth centuries, the art of wax anatomical models in Spain, or neo-gothic polychromies. The confrontation of source research with experimental reconstruction and analysis are illustrated in the study of anthocyanin colorants in Medieval European illuminators workshop or of tempera paint around 1900. Research on artist's materials, such as vermilion, zinc white or turpentine, refers to patents, inventories, diaries and chronicles. The interpretation and transmission of sources

is central to several papers. Innovative databases on Art Technological Sources are also presented.

Stimulus plans: good or bad? Free markets: How free are they? Jobs: Can we afford them? Capitalism, socialism, and communism: What’s the difference? Corporations: Are they people? For those who want to better understand what Wall Street and Washington know (or say they know), this graphic history, with clear, witty writing and quirky, entertaining art, transforms “the dismal science” of economics into a fun, fact-filled story about human nature and our attempts to make the most of what we’ve got. “Quite accessible . . . This workbook combines methodology and practice for beginning translators with a solid proficiency in French. It assumes a linguistic approach to the problems of translation and addresses common pitfalls, including the delineation of “translation units”, word polysemy, false cognates, and structural and cultural obstacles to literal translation. The first part of the book focuses on specific strategies used by professionals to counter these problems, including transposition, modulation, equivalence, and adaptation. The second part of the book provides a global application of the techniques taught in the opening sections, guiding the student

through step-by-step translations of literary and non-literary excerpts. The revised edition clarifies some of the finer points of the translation techniques introduced in the first edition, provides extra practice exercises, and offers information on a website that can be used in class.

A best-selling modern masterpiece in the author's home country of Egypt, *Taxi* consists of fifty-eight fictional monologues with Cairo taxi drivers that have been recreated from the author's own experience, taking the reader on a roller-coaster of emotions as bumpy and noisy as the city's potholed and chaotic streets. Described as an urban sociology, an ethnography, a classic of oral history - and a work of poetry in motion - it tells Herculean tales of the struggle for survival and dignity among Greater Cairo's 80,000 cab drivers.

Language Diversity in the Sinophone World offers interdisciplinary insights into social, cultural, and linguistic aspects of

multilingualism in the Sinophone world, highlighting language diversity and opening up the burgeoning field of Sinophone studies to new perspectives from sociolinguistics. The book begins by charting historical trajectories in Sinophone multilingualism, beginning with late imperial China through to the emergence of English in the mid-19th century. The volume uses this foundation as a jumping off point from which to provide an in-depth comparison of modern language planning and policies throughout the Sinophone world, with the final section examining multilingual practices not readily captured by planning frameworks and the ideologies, identities, repertoires, and competences intertwined within these different multilingual configurations. Taken together, the collection makes a unique sociolinguistic-focused intervention into emerging research in Sinophone studies and will be of interest to students and scholars within the discipline.
