Oman A "Spy" Guide - Strategic Information and Developments

**Oman Tax Guide - Strategic, Practical Information, Regulations** Lulu.com

UCLG's Third Global Report on Local Democracy and Decentralization (GOLD III) examines basic service provision and the current state-of-play of the local governance of basic services around the world. Basic Services for All in an Urbanizing World examines the enormous challenge of ensuring the universal provision of basic services in a world that is being shaped by rapid global urbanization, climate change, and economic, social and technological transformation. The world's urban population is predicted to reach 5 billion people within the next 20-30 years. The report analyses the conditions necessary for local governments to provide these new urban residents with quality basic services. Water, sanitation, waste management, transport and energy are essential, not only for the preservation of human life and dignity, but also in driving economic growth and ensuring social equality. Each chapter examines a world region, drawing on existing research and consultation with local authorities on the ground. The chapters review access levels, legal and institutional frameworks, and the different ways in which basic services are managed and financed, as well as showcasing diverse examples of innovation in the local and multi-level governance of services. It concludes with a set of recommendations for all stakeholders with a view to making the goal of basic services for all a reality. This report contributes to discussions on the Millennium Development Goals and the UN Post-2015 Development Agenda. The findings of GOLD III will also be essential to promoting the vision of local governments at the 2016 UN Conference on Human Settlements (Habitat III).

*Proceedings of the Fifth International Conference of Transportation Research Group of India* Routledge

The book traces urbanisation patterns in Oman looking at the coastal strip of Muscat Capital Area. This metropolitan region emerged within the last 50 years almost out of nowhere and is now home of the majority of the national and expatriate population of Oman. Urbanisation, and the socio-political, economic and environmental aspects attached to it, become an index of the radical spatial transformation of the Sultanate. This process, if managed well, also holds the key to sustainable urban development. Urban Oman invites geographers, planners, urban designers, architects, decision-makers and scholars of Gulf Studies to rethink the emergence of Muscat Capital Area and to embrace the urban Oman. Sonja Nebel, architect and urban planner, is researcher and consultant with focus on international urban development, rehabilitation and urban management, affiliated to TU Berlin and GUTech, Oman. Aurel von Richthofen, architect and urbanist, is working on urban renewal and spatial planning strategies, and is currently researcher at the Future Cities Laboratory in Singapore affiliated to the ETH Zurich, Switzerland.

*Oman & the United Arab Emirates* Springer Science & Business Media

The Routledge Handbook on Tourism in the Middle East and North Africa examines the importance of tourism as a historical, economic, social, environmental, religious and political force in the Middle East and North Africa (MENA). It highlights the ecological and resource challenges related to water, desert environments, climate change and oil. It provides an in-depth analysis of the geopolitical conditions that have long determined the patterns of tourism demand and supply throughout the region and how these play out in the everyday lives of residents and destinations as they attempt to grow tourism or ignore it entirely. While cultural heritage remains the primary tourism asset for the region as a whole, many new types of tourism are emerging, especially in the Arabian Gulf region, where hyper-development is closely associated with the increasingly prominent role of

luxury real estate and shopping, retail, medical tourism, cruises and transit tourism. The growing phenomenon of an expatriate workforce, and how its segregation from the citizenry creates a dual socio-economic system in several countries, is unmatched by other regions of the world. Many indigenous people of MENA keep themselves apart from other dominant groups in the region, although these social boundaries are becoming increasingly blurred as tourism, being one socio-economic force for change, has inspired many nomadic peoples to settle into towns and villages and rely more on tourists for their livelihoods. All of these issues and more shape the foundations of this book. This Handbook is the first of its kind to examine tourism from a broad regional and inclusive perspective, surveying a broad range of social, cultural, heritage, ecological and political matters in a single volume. With a wide range of contributors, many of whom are natives of the Middle East and North Africa, this Handbook is a vital resource for students and scholars interested in Tourism, Middle East Studies and Geography.

*Computers in Railways XIII* WIT Press

This book offers a comprehensive global examination of the relationship between public transport and tourism as well as exploring other sustainable transport modes. It offers a unique view by analysing tourism through the public transport lens and vice versa. The volume provides an account of how the public transport experience can be improved for tourists so that its value can be maximised and a greater number of people can be encouraged to shift modes. It features a wide range of case studies and examples showing how the tourism industry, as well as regional economies, communities and the environment, benefit when public transport is widely used by tourists. The book will be of interest to researchers and students in the fields of tourism and transport as well as destination marketing organisations and tourism, transport and urban planners.

*Journal of Public Transportation* Lulu.com

This volume focuses on the role of the private sector in diversifying the economics of Gulf countries in the post-petrodollar era, when fluctuating and declining oil prices are negatively impacting national expenditures. It explores current policies of countries in the Gulf Cooperation Council and their efforts to shift their economies away from heavy dependence on hydrocarbons. The structural changes will create favorable conditions for the private sector to flourish, shift production dependence from public to private sector, and allow for more efficient resource allocation. Such changes will also allow local banks to provide financial support to small and medium enterprises, boost entrepreneurship for job creation, and strengthen organizational structure and efficiency. This is the first volume in Economic Diversification in the Gulf Region.

*Islamic Business Organizations (Companies) Laws and Regulations Handbook Volume 1 Strategic and Legal Information* IGI Global

The sultanate's economy continues to enjoy the benefits of petroleum wealth, which has provided budget surpluses in most years and served as a backbone for growth. However, planning is well under way for an era in which oil will not be the main economic driver, with the twin goals of diversification and creating an increased number of private sector jobs at the top of the government's current agenda. Indeed, in recent years, the non-OPEC oil exporter's economy has been undergoing a steady transformation, reorienting from oil toward a more diverse set of service and industry-based economic activities. So far, progress has been promising. In 2011 oil and gas accounted for 38.8% of GDP. With the continuation of higher-than-expected energy prices in 2012, the government has increased economic investments accordingly. These investments, which include infrastructure, social programmes and small-business development, are aimed toward better preparing the country for its post-fossil fuel future.

**Engineering Tools and Solutions for Sustainable Transportation Planning** Springer Science & Business Media

This book gathers papers from the 11th Construction Industry Development Board (cidb) Postgraduate Research Conference, held on 28-30 July 2019 in Johannesburg, South Africa. The conference provided an essential forum for reviewing and generating knowledge on Construction 4.0 and,

consequently, highlighted processes and practices that allow us to deliver and operate built environment assets more effectively and efficiently by focusing on physical-to-digital and digital-to-physical transformation. The event addressed three broad themes: Industrial production (prefabrication, 3-D printing and assembly, offsite and advanced manufacturing); Cyber-physical systems (actuators, sensors, IoT, robots and cobots for repetitive and dangerous tasks, and drones for mapping, progress monitoring, safety and quality inspections, lifting, moving and positioning); and Technologies (digital ecosystems, digital platforms, BIM, video and laser scanning, AI and cloud computing, big data and data analytics, reality capture, blockchain, simulation, virtual and augmented reality, data standards and interoperability, and vertical and horizontal integration). Given its scope, the book will be of interest to all construction industry and architectural professionals who want to learn about cutting-edge technologies applied to construction *Tourism, Public Transport and Sustainable Mobility* Lulu.com

While modern cities continue to grow and become more efficient in many sectors as their population increases, public transportation has not yet caught up. As a significant industry in contemporary society, further progress in transportation systems is more vital than ever. *Engineering Tools and Solutions for Sustainable Transportation Planning* is an informative reference source that outlines why current transportation systems have become inefficient in modern societies, and offers solutions for the improvement of transportation infrastructures. Highlighting key topics such as parking organization, car ownership, energy consumption, and highway performance, this is a detailed resource for all practitioners, academics, graduate students, and researchers that are interested in studying the latest trends and developments in the transportation sector.

**Privatization and Structural Adjustment in the Arab Countries** SAGE Publications

Desert safaris and trips to archaeological sites are just two of the many adventures these countries have to offer. Maps, tips on where to stay and eat, and advice on other practicalities are all covered in this guide.

**Handbook of Sustainable Travel** LIT Verlag Münster

This seminar volume, edited by Said El-Naggar, examines the challenge that Arab countries with large public sectors face in placing the privatization process within the wider context of structural change.

**Oman Fishing and Aquaculture Industry Handbook - Strategic Information, Regulations, Opportunities** IGI Global

This paper discusses the findings and recommendations of the Report on Observance of Standards and Codes (ROSC)—Data Module for Oman. It is observed that Oman has made significant progress in the compilation and dissemination of macroeconomic statistics since the 2004 ROSC mission. The main progress has been achieved in monetary statistics, price indices, and balance of payments, in particular the introduction of the producer price index, and improvements in data relevance, transparency, classification, and sectorization. The report also recognizes the need for Oman to move to higher data standards and identifies shortcomings in statistical practices and products that remain to be addressed.

**Major Companies of the Arab World** International Monetary Fund

Oman's economy contracted by 13.8% in nominal terms in 2015 as the ongoing low oil price environment squeezed growth and led to the largest budget deficit in over a decade. In a bid to tackle the shortfall the government is taking a number of revenue-raising measures such as cutting subsidies and increasing corporation tax, while remaining focused on its long-term diversification goals. Though hydrocarbons still account for 33.9% of GDP and 78.7% of state revenues, non-oil sectors are playing an increasingly prominent role in the country's economic profile. Authorities are targeting heavy industries in particular with plans to boost their GDP contribution to from 19.8% today to 29% by 2020. Meanwhile annual growth of 6% is being targeted in the mining sector, with a host of regulatory initiatives being implemented as the government seeks to boost investor interest. Start reading

*The Palgrave Encyclopedia of Urban and Regional Futures* Springer

The International Directory of Government is the definitive guide to people in power in every part of the world. All the top decision-makers are included in this one-volume publication, which brings together government institutions, agencies and personnel from the largest nations (China, India, Russia, etc.) to the smallest overseas dependencies (Guadeloupe, Guernsey and Christmas Island, etc). Institutional entries contain the names and titles of principal officials, postal, e-mail and internet addresses, telephone and fax numbers, and other relevant details. Key features: - comprehensive lists of government ministers and ministries - coverage of state-related agencies and other institutions arranged by subject heading - details of important state, provincial and regional administrations, including information on US states, Russian republics, and the states and territories of India.
